SILIPOS®

How Silipos Active Gel Works

Cushions and Protects

Because of its visco-elastic or fluid -like nature, our patented Gel absorbs impact, pressure, shock and vibration.

Insulates Against Friction and Irritation

Fluid-like and amazingly elastic, it moves with the skin reducing friction, abrasion and burning sensations in all directions.

Comforts Sore Areas

Naturally supple and moist, our Gel conforms to the contours of the body and stays in place so you can resume your active lifestyle.

Moisturizes & Lubricates

The Gel contains a medical grade mineral oil that gradually diffuses into the skin, fighting against calluses and dryness.

Helps in Healing

This unique Gel helps to improve skin elasticity and is clinically effective in minimizing scarring.

Durable and Long-Lasting

Stretch it up to 50 times its size, the Gel will not bottom out or lose its shape. It is washable and reusable yet will retain all of its unique benefits. Odorless, non toxic and hypoallergenic, the Gel does not support bacterial growth and is dermatologist tested.
