## Prepreg

**WE CAN NOW OFFER BASALT PREPREG:**

LimbTex has developed Prepreg in Basalt.

# Prepreg

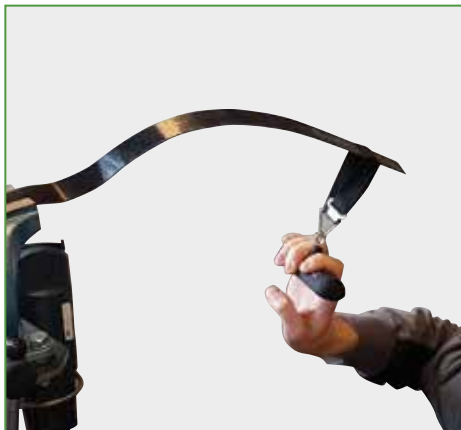

## WE CAN NOW OFFER BASALT PREPREG:

LimbTex Basalt is an eco-friendly and natural material that is less hazardous than the traditional carbon fibre.

In addition to being better for the environment, the Basalt fibre is also more gentle to the skin, preventing irritation from dust and loose fibres.

In use, the Basalt Prepreg has been found to have very good mechanical properties.

These pictures illustrate the bending properties of 1) Basalt Prepreg UD 350g m<sup>2</sup> compared with 2) Carbontype SHD 1022-300g m<sup>2</sup>

1) Basalt Prepreg UD 350g m<sup>2</sup>

2) Carbontype SHD 1022-300g m<sup>2</sup>

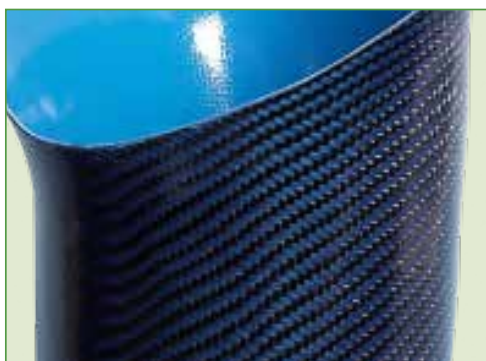

### BPPUD350

Basalt Prepreg UD 350gsm, 0,5 x 20m Roll (10m<sup>2</sup>)

### BPPT400

Basalt Prepreg 4/4 Twill 400gsm 1 x 10m Roll (10m<sup>2</sup>)

### CTPPBLUE

Carbon/Polyester Prepreg 2/2 Twill 210gsm  
750 x 1330mm 1m<sup>2</sup>

### SILSHT/5

Silicone Sheet 1mm x 1000 x 5000mm 5m<sup>2</sup>
