# "Orliven® cares for your legs"

TECHNICAL COMPRESSION SOCKS

Frequently in our busy daily working lives, from when we wake up until we go to bed, juggling family and work obligations, we tend to overlook the efforts made by our legs and forget to take care of them properly.

Sporting activities, jobs that require sitting or standing for a long time, seasonal changes, heredity, age, lifestyle, habits, etc., can result in tired or aching legs or venous problems that affect both men and women of all ages.

Orliven is the new brand of technical socks from Orliman, born from the philosophy of contributing to the welfare of the people, providing the required benefits and responding to a growing demand with 3 different ranges of socks.

#### orliven

Technical compression socks for general sports: running, cycling, triathlon, tennis, etc.

#### orliven

Technical compression socks for tired legs, overload and people who may suffer the well-known "tourist syndrome".

#### orliven

Designed for diabetic foot. Prevent the growth of bacteria and fungi and have low compression to offer maximum comfort to the foot.

#### Why use compression socks?

à

orliven

- > Aid muscle recovery and reduce muscle aches and fatigue.
- > Improve venous return and blood circulation
- Breathable and keep a constant temperature of the lower limbs during physical exercise..
- Provide protection and support against potential impacts.

"Air channels"

#### SPORTS COMPRESSION SOCKS

Today's society is increasingly concerned about maintaining healthy habits in all fields of sport, diet and working life.

どう ディーデー あい

This has led to exponential growth in the use of compression socks or stockings that respond to the needs of both professional athletes and amateurs, improving circulation in the legs, reducing muscle pain and recovery time.

#### MAIN BENEFITS:

- Improve venous return and muscle recovery.
- Reduce recovery time.
- Prevent against muscle injury.
- Allow the area to breathe and keep a constant temperature of the lower limbs.
- Provide greater protection for the most vulnerable areas (Achilles tendon, calves, toes and soles of the feet), minimising impact during sporting activities.
- Padded area at the top of the instep to avoid discomfort or chafing from shoes.

#### COMPOSITION:

72% Polyamide 28% Lycra

> Padded and ergonomic design Increased comfort

#### TRAVEL SOCKS

Journeys that involve being seated for several hours can lead to the well-known "tourist syndrome", just like other sedentary activities or occupations. Venous return in the lower limbs becomes difficult and this can lead to pain or fatigue in the legs.

▲ 🖗

#### ▶ MAIN BENEFITS:

- Stimulates and promotes venous return.
- Protects against possible impact injuries and abrasions on toes and heels.
- Recommended for long journeys.

75% Polyamide 25% Lycra
